

**O&L Nexentury SA** specializes in developing, financing, constructing and operating photovoltaic (PV), energy storage and complex renewable energy infrastructure solutions for utility scale energy intensive industries, mining operations, C&I companies and the public sector. Our geographic focus extends throughout the SADC region.

Spread across 5 offices internationally **O&L Nexentury SA** is part of the **O&L Group of Companies**, which is a diversified employer of over 6,000 people with companies such as Namibian Breweries, Pick and Pay Namibia, Hanganana Fisheries in its impressive portfolio. Owing to its more than **100-year history** and contributing in excess of 4% of the total Namibian GDP, **O&L Group** prides itself with investing in its work force and believes in long-term employee relationships and growth, as well as regional and international expansion.

This is an exciting opportunity for a qualified and commercially minded **Junior Financial Analyst** to join a growing team of professionals, within a leading and reputable renewable energy and infrastructure developer, in Southern Africa.

## Junior Financial Analyst

### PURPOSE OF THE POSITION:

The **Junior Financial Analyst** will be a part of a **dynamic and international** IPP development Team and will work under the guidance of the Financial Associate in the areas of project finance during the early stage of a project's life cycle. With commercial targets, financial modelling, project finance planning, controlling and support in budget planning and in the development of financial models, the Junior Financial Analyst will work within the Project Team and together with the technical and corporate department. In addition, he or she will be developing high-end presentations for potential client's, financing institutions and management as well as conducting market research and analysis.

### QUALIFICATIONS & EXPERIENCE:

- University degree in Economics or Finance;
- Qualified and verifiable professional experience in project finance in the commercial and industrial sector / photovoltaic sector;
- analytical understanding of the renewable energy market
- excellent knowledge of MS Excel based cash flow modelling for asset and corporate valuation purposes
- High degree of self-motivation, pride in process ownership, systematic problem solving and process management skills
- A commercial understanding of the financial and legal value drivers that support or discredit the feasibility of any give project
- Derives a sense of purpose and motivation from developing and executing renewable energy projects in a highly independent and challenging environment;
- Fluent in spoken and written business English
- Experience in Project Finance of large scale PV projects is a plus
- Experience in working across functional teams is a plus
